

Q&A ON GROUPING TEAM DOING SCIENTIFIC RESEARCH PROJECT

1. The minimum and maximum member in each group?

There is at least 1 member and no more than 3 members in a group.

2. Is it right to change member after registration or during the project progress?

You can have any shift or change in member(s) after having announcement to your group instructor and department of scientific research of your faculty. If student shift their member(s) or have change in group organization without any announcement, faculty does not take the responsibility for any deprivation afterward.

3. Criteria for grouping team doing scientific research project?

Based on real experiences from senior, a group of scientific research project should include those members who are equivalent in coherence, or expert in at least one specific field (e.g. external relations, promotion, logical, researching,...), the entire group have strong passion for scientific research and a high sense of responsibility.
